## Defect Tracking

Defect ID: 1

Defect description: Unhandled exception somewhere in new bot code

Steps taken to produce the defect: Start the system and add a bot that calls  
GetVisibleEntities()

Platform information: AMD Athlon 1200, 768MB Memory, 10GB free disk space, ATI  
Radeon 9600 Video Card

Defect's current status: Open

Person who detected the defect: Scott

Date the defect was detected: March 29, 2005

Severity: critical

Phase in which defect was created: designing agent desire decision system

Phase in which defect was detected: testing agent desire decision system

Date the defect was corrected: March 31, 2005

Person who corrected the defect: Whole team together

Effort required to correct the defect: Two days work

Work product or products corrected: Main FEAR/Q2 Code Fixed

Resolution: Started with older working code again and slowly added functions to achieve  
the ability to pass entity attributes to agents and to the console for testing

Other notes: Very exciting, allows a lot of options for things for us to play around with  
now.
